## 2. COVID 19 SAFETY PROTOCOLS

## Covid 19 Safety Protocols

According to the provisions of Royal Decree 286/2022 of April 19, which modifies the mandatory use of masks during the health crisis situation caused by COVID-19, the guidelines and recommendations given for the use of the mask are as follows:

- The use of a mask will be voluntary
- As long as the interpersonal distance is less than 1.5 m, the use of a mask is recommended.

### They will wear a mask mandatory:

- Vulnerable personnel, when the interpersonal distance is less than 1.5 m. Personnel are considered vulnerable people over 60 years of age, immunosuppressed people or pregnant women
- Any worker who has symptoms consistent with COVID-19 (cough, dyspnea, sore throat, head or chest pain, runny nose, fever, diarrhoea, loss of smell and taste)
- Close contacts of confirmed cases

Regardless of the above guidelines, the current preventive measures will continue:

- Hand hygiene with hydroalcoholic gel.
- Cleaning and disinfection of work centers.
- Adequate ventilation of the rooms.

These measures may be modified as provided by the competent Health and Labor Authority, as well as if expense of reviewing the risk assessment of the center and jobs as indicated in the exhibition of reasons of the aforementioned Royal Decree it is considered so.
